PROFILE

IT Manager with 4+ years of hands-on work in Linux and Windows servers, networks, ERP and e-commerce. I run the full IT stack of a sports-brand distributor in Saudi Arabia: 600 employees in 9 branches. I own systems end to end: deployment, monitoring, backups, security incidents and user support. I bring the same approach to DevSecOps and cloud: CI/CD with security scans, containers and Kubernetes, Terraform and Azure — shown in two public projects on GitHub.

EXPERIENCE

IT Manager — Raed Sports

2025 - today

Riyadh, Saudi Arabia

- Run the servers and IT infrastructure (Linux and Windows) for 600 employees in 9 branches: user accounts, access control, patching, backups and restore tests.
- Own babolatksa.com, a bilingual Arabic/English WooCommerce store with about 1,400 products: hosting, deployments, plugins, performance and uptime.
- Run and support the company ERP (ERPNext, Odoo, Daftara): deployment, version updates, troubleshooting and user training.
- Manage DNS, hosting and SSL certificates for company domains, including domain moves without downtime.
- Handle security incidents end to end: investigation, cleanup, system hardening and preventive controls.
- Operate Amazon and Noon marketplace listings, product data and integrations; internal IT support and onboarding.

Freelance IT and Web Developer

2023 - 2025

Remote

- Built and maintained WordPress and WooCommerce websites for clients, including hosting, domains and SSL.
- Administered VPS servers and deployed self-hosted web applications end to end.

IT Support Specialist — Farma Care Hospital

2021 - 2023

Cairo, Egypt

- Supported the hospital information system: user accounts, permissions and first-line troubleshooting.
- Maintained workstations, printers and network equipment; diagnosed LAN/WLAN problems with vendors.
- Ran routine backups, antivirus management and software deployment.

IT Support — MedCare Hospital

2020 - 2021

Sharqia, Egypt

- First-line IT support for staff: hardware, operating systems, printers and network access; documented recurring fixes.

DEVSECOPS PROJECTS

Secure delivery pipeline github.com/s0sta/secure-delivery-pipeline

GitHub Actions with tests, gitleaks, Semgrep and Trivy; SBOM with Syft; keyless cosign signing and SLSA provenance; Argo CD GitOps (dev automatic, prod through a reviewed pull request); Kyverno admission and default-deny network policies.

Azure k3s platform github.com/s0sta/azure-k3s-platform

Terraform (VNet, NSG, NAT gateway, load balancer, VMs, Key Vault, Azure Monitor) with OIDC login and plan on pull requests; Ansible hardening and k3s with audit log and encrypted secrets; Prometheus, Grafana, Loki and Fluent Bit.

DevSecOps knowledge base s0sta.com/summary

Summaries of RHCSA, RH124, RH134, AZ-104, Terraform, CKA and CKS, 287 command pages and hands-on labs, in plain PHP.

SKILLS

Linux and Windows	RHEL, Ubuntu, Debian, Windows Server; systemd, SELinux, LVM, SSH hardening, backups and restore
Cloud and IaC	Azure, Terraform, Ansible, cloud-init
Containers	Docker, Podman, Kubernetes (k3s), Helm, Kustomize, Argo CD
CI/CD and security	GitHub Actions, Git, Trivy, Semgrep, gitleaks, cosign, Syft, Kyverno, incident response, hardening
Monitoring	Prometheus, Grafana, Loki, Fluent Bit, Azure Monitor
Networking	LAN/WLAN, VLANs, firewalls, VPN, DHCP, DNS, SSL/TLS, Nginx, Apache
Web and ERP	WordPress, WooCommerce, PHP, Rank Math SEO; ERPNext/Frappe, Odoo, Daftara
Scripting	Bash, Python, HTML, CSS, JavaScript
