Hosam Hani

IT Manager · DevSecOps and Cloud

Riyadh, Saudi Arabia · +966 55 618 7299 · hosamhanyaa@gmail.com · s0sta.com · github.com/s0sta · linkedin.com/in/hosam-hani-abdelati

PROFILE

IT Manager with 4+ years of hands-on work in Linux and Windows servers, networks, ERP and e-commerce. I run the full IT stack of a sports-brand distributor in Saudi Arabia: 600 employees in 9 branches. I own systems end to end: deployment, monitoring, backups, security incidents and user support. I bring the same approach to DevSecOps and cloud: CI/CD with security scans, containers and Kubernetes, Terraform and Azure.

EXPERIENCE

IT Manager

2025 – today

Raed Sports, Riyadh, Saudi Arabia

- Administer company servers and IT infrastructure across Linux and Windows for 600 employees in 9 branches: user accounts, access control, patching, backups and restore tests.
- Own babolatksa.com, a bilingual Arabic and English WooCommerce store with around 1,400 products: hosting, deployments, plugin maintenance, performance and uptime.
- Run and support the ERP system (ERPNext, Odoo, Daftara): deployment, version updates, troubleshooting and user training.
- Manage DNS, hosting and SSL certificates for company domains, including domain migrations without downtime.
- Respond to security incidents end to end: investigation, cleanup, system hardening and preventive controls.
- Operate Amazon and Noon marketplace listings, product data and integrations.
- Provide internal IT support: workstations, network, peripherals and onboarding for new staff.

Freelance IT and Web Developer

2023 – 2025

Remote

- Built and maintained WordPress and WooCommerce websites for private clients, including hosting, domain and SSL setup.
- Administered VPS environments and deployed self-hosted web applications end to end.
- Intensive self-study in software development, Linux administration and web security.

IT Support Specialist

2021 – 2023

Farma Care Hospital, Cairo, Egypt

- Maintained workstations, printers and network equipment across hospital departments.
- Supported the hospital information system: user accounts, permissions and first-line troubleshooting for staff.
- Diagnosed LAN and WLAN connectivity issues and coordinated hardware replacement with vendors.
- Performed routine backups, antivirus management and software deployment.

IT Support

2020 – 2021

MedCare Hospital, Sharqia, Egypt

- Provided first-line IT support for staff: hardware, operating systems, printers and network access.
- Installed and configured workstations and peripherals, and documented recurring issues and fixes.

DEVSECOPS PROJECTS

Secure delivery pipeline

github.com/s0sta/secure-delivery-pipeline

CI/CD and supply-chain security

A Python API delivered the DevSecOps way: tested and scanned on every change, built once, signed, deployed by GitOps, and the cluster only runs images signed by this pipeline.

GitHub Actions · Docker · Kubernetes · Kustomize · Argo CD · Kyverno · Trivy · cosign

Azure k3s platform

github.com/s0sta/azure-k3s-platform

Infrastructure as Code

A small production-style Kubernetes platform on Azure, built only from code and delivered through a pipeline that logs

in to Azure without secrets.
Terraform · Azure · Ansible · k3s · Helm · Prometheus · Grafana · Loki

SKILLS

Cloud and DevSecOps: Azure, Terraform, Ansible, Docker and Podman, Kubernetes (k3s), GitHub Actions, Argo CD, Trivy and Cosign
